Carbon fibre insert	Custom Blue Fin trailer
Available in tiller steer	

About the Wildcat

The 4.35 Wildcat is built with great attention to detail and, with 3mm sheet used for both bottom and topsides, it is more than tough enough to withstand the bangs, knocks and vibrations that are the reason why we buy tinnies in the first place.

It is an exceptionally well-built boat, easy to power and does not need a lot of horsepower for good performance.

A very stable boat for fishing with a big console, a full height aft bulkhead, storage underneath the forward deck, a big, wide, uncluttered deck and a pair of pedestal seats with appropriate mountings strategically placed including one on the casting deck.

The casting deck is ideal for all sportfishing and includes a 90ltr Flowrite equipped livewell, plumbed and ready for use

Available in the colour of your choice and with a range of options see your dealer for more information.
